SUMMARY

Full-Stack Software Engineer with 3+ years of experience building scalable backend systems and end-to-end web and mobile applications across Java and JavaScript ecosystems. Experienced in Java, Spring Boot, Node.js, TypeScript, React, and PostgreSQL, with expertise in microservices, REST API design, SQL optimization, transactional systems, real-time communication, secure APIs, and cloud deployments using AWS and Google Cloud.

TECHNICAL SKILLS

Languages & Frameworks: Java (11/17), JavaScript (ES6+), TypeScript, SQL, Python, Spring Boot, Hibernate/JPA, Node.js, Express.js

Front-End: React.js, Next.js, React Native, Tailwind CSS, Redux, Zustand

Architecture & Security: Microservices, multi-tenancy, event-driven architecture, REST API design, JWT, RBAC, SSO, WebSockets

Data & Messaging: PostgreSQL, MySQL, MongoDB, Redis, AWS SQS, RabbitMQ

Cloud, DevOps & Tooling: AWS (EC2, S3, Lambda, API Gateway, SQS), Google Cloud, Docker, Nginx, Git, GitHub, GitLab, CI/CD

AI & Development Tools: Generative AI, RAG, LangChain, LangGraph, Prompt Engineering, AI Agents, LLM Integration

PROFESSIONAL EXPERIENCE

Techcanopy

Senior Software Engineer I

Bengaluru, Karnataka

Aug 2023 – Present

Eatozone – Multi-Tenant Restaurant & Cafeteria SaaS Platform

- Contributed to the design and development of a multi-tenant restaurant and cafeteria platform serving **25+ restaurant and cafeteria tenants**, with a **React** dashboard, QR-ordering site, and two **React Native** applications, powered by **Java/Spring Boot** and **Node.js** services, a configurable menu engine, and real-time Kitchen Order Ticket synchronization.
- Architected **multi-tenant PostgreSQL** infrastructure with tenant-resolution middleware, schema provisioning, and **Liquibase** migrations, cutting new-tenant setup time from **3 days to under 4 hours**.
- Automated a ledger batch service using **Java virtual threads** to process **20 tenants concurrently** for nightly sales, settlement, and payout files; Architected a pluggable payment gateway abstraction supporting **Razorpay, PhonePe, and PayU**.
- Established an **event-driven notification pipeline** using **AWS SQS**, reliably delivering **80K+ email, SMS, and push notifications per month** with built-in retry safeguards.
- Reduced p95 response times on high-traffic read APIs from **500–1,000 ms to under 100 ms at 200 concurrent users** through Redis caching, SQL optimization, and removal of unnecessary customization-table joins; virtualized the KOT ticket list to eliminate render lag.
- Secured the platform across **20+ tenant accounts** using **Firebase Authentication, JWT-based authentication, entity-level RBAC, and Cognito-backed SSO**.

Rexx – Academic Management Platform

- Identified and resolved critical performance bottlenecks in a production ed-tech platform serving **12+ universities**, reducing dashboard load times from **4–5 minutes to under 10 seconds** through end-to-end SQL, backend, and frontend optimization.
- Designed and optimized high-volume data access using **complex SQL queries and stored procedures**, stabilizing dashboards over datasets of **50K+ student records** without crashes or first-load latency.
- Delivered multiple **data-intensive academic dashboards** aggregating academic performance and progress metrics for **150+ mentors and administrators**.
- Engineered a **real-time mentoring system** with appointment scheduling, live chat, and secure file sharing for **5,000+ students**, using **WebSockets (Socket.IO)** and **AWS S3 signed URLs**.
- Engineered a **multi-database system** with a singleton database connection layer, enabling a single backend to securely access **12+ university databases** through a centralized master database.

IFAclick – Mutual Fund Distribution CRM

- Contributed to a **multi-tenant SaaS CRM** for **40+ Mutual Fund Distributors (MFDs)**, integrating client management, investment portfolios, SIP tracking, risk profiling, documents, follow-ups, and RTA-fed investment data into a unified platform.
- Designed and shipped an end-to-end **CAMS/KFin RTA ingestion pipeline** using Python, Node.js, and PostgreSQL to process up to **200K transactions per sync** from encrypted reports, archive source files in S3, and synchronize clients, folios, transactions, and SIP mandates into the CRM.
- Overhauled high-volume RTA synchronization from HTTP-based processing to **direct PostgreSQL writes** with staging, batch processing, ordered punch queues, and advisory locks, improving import throughput by **60%**.
- Delivered investment and SIP workflows across **Node.js/Express and Next.js**, including holdings, SIP views, dashboard metrics, reminders, and live RTA-backed investment data for **25K+ investor accounts**.
- Extended the platform with **insurance workflows**, including policy data models, PDF field extraction, claims views, and policy-linked renewal and follow-up tasks, covering **3,000+ policies**.
- Built CRM experiences using **Next.js, TypeScript, React, and TanStack Query**, including dashboard widgets, multi-tab lead details, investment and SIP views, and organization-level workflows.

PROJECTS

ReviewPulse – Code Review Assistant | *FastAPI, React, Gemini 2.5 Flash*

- Built a local-first code review assistant that analyzes Git branch changes and generates structured, per-file insights using an LLM.
- Developed a FastAPI backend to compute Git diffs, extract file-level changes, and orchestrate automated code review workflows.
- Implemented rule-based checks to identify coding standard violations and provide clear, actionable recommendations.
- Streamlined code review by generating concise, structured findings and improvement suggestions per file, reducing manual review time by **30%**.
- Built PR-style diff views with highlighted code changes and review annotations to provide an intuitive developer review experience.

EDUCATION

RV College of Engineering

Master of Computer Applications

Karnataka, India

Feb 2022 – Aug 2023

AWARDS & RECOGNITION

- **Rising Star of the Year** – Annual award, Techcanopy (2024)
- **4× Quarterly Awards** – Pat on the Back, Team Impact, Consistent Contributor and Standout Performer

CERTIFICATIONS

- **Claude Certified Architect – Foundations** – Anthropic.
- **Azure Fundamentals (AZ-900)** – Microsoft, Coursera (2023).
